REASONS FOR ALLOWANCE

Examiner acknowledges a submission of the amendment and arguments filed on September 28, 2004. Claims 1 – 10 are deleted; New Claim 11 is added. Amendment and arguments have overcome rejections under 102 (b) and 103(a).

The following is an examiner's statement of reasons for allowance:

An amended independent Claim 11 discloses the structure that provides when the first and second connector elements are fitted with each other, the connecting terminals of these connector elements contact each other to establish an electrical connection between the signal line of the electronic apparatus body and the signal line of the external apparatus and the pressing member moves the movable member against the biasing member to cut the electrical connection between the first grounding line portion and the second grounding line portion through the movable member.

The closest reference for the claim is Shinpo (JP 08243084), which disclose changing connecting status of the grounding line by switching plugging-in the separate board. However, it does not disclose disconnection of the grounding line between the connector elements by pressing member moving the movable member against the biasing member and cutting the electrical connection between the first and second grounding line portions. Another reference, Tsurumaki (JP 5-211077) discloses the mechanical switching arrangement having the pressing member, the moving member and the biasing member. However, its mechanical switching arrangement does not cut

the electrical connection between the first grounding line portion and the second grounding line portion through the movable member.

Allowability resides, at least in part, in the above-described limitations, which has not been disclosed in the Prior Art in a search.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zeev Kitov whose telephone number is (571) 272-2052.
